* Annuitants whose net personal income exceeds \$95,323 must repay all or a portion of the maximum Old Age Security (OAS). The refund is normally deducted from the monthly pension before it is paid. The entire OAS pension is withheld when the annuitant's net income is at least \$154,708 (for a benefit requested at age 65 and a person under the age of 75). If you are or will be 75 years of age or older, the amount of the OAS pension you receive will be increased by 10% (You will receive the increase in the month following your 75th birthday).

The Guaranteed Income Supplement (GIS) provides an additional income for low-income retirees. It is added to the OAS. The 10% increase in your maximum OAS pension rate at age 75 will not affect the calculation of your Guaranteed Income Supplement (GIS).

The sources of income to calculate GIS eligibility are the following: Canada Pension Plan (CPP) or Quebec Pension Plan (QPP) benefits, benefits from a registered pension plan (pension fund), benefits from a foreign pension plan, RRSP or RRIF income, employment insurance benefits, interest, dividends or capital gains realized from savings, income from rental property, all income from employment or other sources (alimony, employment injury benefits, etc.).

The Allowance and the Allowance for the Survivor are paid to people between age 60 and 64 who have lived in Canada for at least 10 years.

After age 65, the pension will be increased by 0.7% per month, to a maximum of 58.8% for the QPP and 42% for the CPP.
